

Family Trees and Timelines

Family Trees and Timelines is a family-owned small business offering artistic, custom-made representations of your family history.

The family trees are works of fine art created by SLC artist Janet Faught. Janet uses pen, airbrush, and watercolor to create beautiful family trees, which are then filled with digital images representing four generations of genealogy. Janet is also a talented calligrapher and hand letters all family names.

A Timeline preserves the memory of someone important to you. Around the timeline's border are images of parents, grandparents, spouses, children, and siblings. The center section holds a historical timeline and a biographical storyline of the person of interest, capturing who the person is or was, illustrating his or her values and beliefs, bringing their personality to life for future generations to know and enjoy. Visit our web page to see a sample timeline.
