The Fusion of Genealogy + Technology

Digitization & Scanning Services

“ I offer on-site or drop-off scanning and digitization services for your precious photos, slides and memorabilia. I use top-quality professional-level equipment and archival file formats to ensure the resulting digital files can be enjoyed by generations to come. No project is too big or too small! I handle your irreplaceable memories with the same care I give my own. Let me help you digitize so you can preserve and share with family. ”

About DigiDeena Consulting

The mission of DigiDeena Consulting is to educate and conduct genealogical research using the highest standards of ethics and technical proficiency, in order to facilitate successful search, storage and sharing strategies for family historians in the digital age. Deena Coutant is passionate about family history—whether researching her own family, the family of a client, or when volunteering for the genealogical community.
